

Concept Development & Experimentation Working Group (CDE MIWG)

**OUTBRIEF
3 Oct 03**

***Mr. Jack Klevecz
Chairman CDE MIWG***

CDE MIWG Role

- The role of the CDE MIWG is to:
 - **coordinate and facilitate** supporting national activities
 - **share** information related to national activities to promote a common awareness
 - **advise** other multinational (MN) fora on the results of experimentation

CDE MIWG Goal

- *The identification of concepts that will enhance MN interoperability and are suitable for development and experimentation, from the perspective of likely lead or framework nations*

On Going Actions

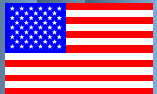

- Review the lessons, results and recommendations from operations, exercises, and experiments to identify MN interoperability issues
- Identify opportunities to leverage exercises and experiments for MN interoperability experimentation

CDE MIWG Actions

Short term (3-6 months)

- **Unified Quest 03 and Pinnacle Impact 03 results to the MIC**
 1. Who: United States
 2. When: Within 90 days of result release
 3. How: CDE MIWG Chair to request it from the US MIC principal for release to the MIC via the CAPSTONE MIWG
 4. Why: Provide to the MIC community so that they can conduct a review of experiments for relevance to MN interoperability
- **Provide the quick look results of MN LOE 3 to the MIC.**
 1. Who: United States
 2. When: Within 30 days of result release
 3. How: CDE MIWG Chair to request it from the US MIC principal for release to the MIC via the CAPSTONE MIWG
 4. Why: Provide to the MIC community so that they can conduct a review of experiments for relevance to MN interoperability

CDE MIWG Actions

Short term (3-6 months)

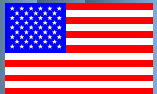

- **Nations provide MN interoperability issues resulting from MN LOE 3 analysis**
 1. Who: All national representatives to the CDE MIWG
 2. When: Within 90 days of result release
 3. How: CDE MIWG Chair to request it from the each MIC principal for release to the MIC via the CAPSTONE MIWG
 4. Why: Provide to the MIC community so that they can conduct a review of experiments for relevance to MN interoperability
- **Provide the analysis of the German hosted MN Information Operations experiment**
 1. Who: Germany
 2. When: Within 90 days of result release
 3. How: CDE MIWG Chair to request it from the German MIC principal for release to the MIC via the CAPSTONE MIWG
 4. Why: Provide to the MIC community so that they can conduct a review of experiments for relevance to MN interoperability

CDE MIWG Actions

• Short term (3-6 months)

- **Review the implementation of the MN interoperability recommendations from MN LOE 1**
 1. Who: All nations
 2. When: 31 Dec 03
 3. How: CDE MIWG Chair to request the results of LOE 1 from the US MIC principals, for release to the MIC via the CAPSTONE MIWG
 4. Why: Provide to the MIC community so that they can conduct a review of experiments for relevance to MN interoperability
- **Review the implementation of the MN interoperability recommendations from MN LOE 2.**
 1. Who: All nations
 2. When: Within 90 days of result release
 3. How: CDE MIWG Chair to request the results of LOE 2 from MIC principals, for release to the MIC via the CAPSTONE MIWG
 4. Why: Provide to the MIC community so that they can conduct a review of experiments for relevance to MN interoperability

CDE MIWG Actions

Long term (12 months, 24 months, 5 years)

- Review the lessons from JTFEX 04-2 and provide MN interoperability issues to the MIC
 1. Who: Participating nations
 2. When: Within 90 days of result release
 3. How: CDE MIWG Chair to request the results from the appropriate MIC principals, for release to the MIC via the CAPSTONE MIWG
 4. Why: Provide to the MIC community so that they can conduct a review of experiments for relevance to MN interoperability
- Review the lessons from Unified Quest 04 and provide MN interoperability issues to the MIC
 1. Who: Participating nations
 2. When: Within 90 days of result release
 3. How: CDE MIWG Chair to request the results from the appropriate MIC principals, for release to the MIC via the CAPSTONE MIWG
 4. Why: Provide to the MIC community so that they can conduct a review of experiments for relevance to MN interoperability

CDE MIWG Actions

Long term (12 months, 24 months, 5 years)

- Developing the procedures to leverage experimentation results through other venues

Recommendations to the CAPSTONE MIWG

1. That the MIC Principals institutionalize the distribution of national lessons relevant to MN interoperability
2. That a national level review & analysis be conducted on existing operational lessons to extract MN interoperability issues for distribution to the MIC
3. That MN LOE 3 national level reviews and analysis include MN interoperability issues
4. That future experimentation activities include the analysis of MN interoperability issues, as appropriate

CDE MIWG Outbrief , 3 Oct 03

Welcomes

Col Maurice de Langlois

CAPT Kevin Laing

CAPT Fred Stappen

Maj Tim Millen

Mr Ron Maxwell

Mr Jeff Acosta

Mr Bob Craig

CDE MIWG out brief , 3 Oct 03

The End
